LEAN+GREEN® PHILOSOPHY

Lean+Green® is O-I's award-winning response to the need for sustainable innovation in the Australian wine industry.

The first step in Lean+Green® is lightweighting 750mL claret and burgundy bottles, by up to 28%.

This process not only delivers lighter containers, but also provides significant energy and water efficiencies per bottle, along with more bottles on pallets.

So choosing leaner and greener wine bottles means improved environmental outcomes for your business and your customers - without compromising the premium look and feel of your products.

PARTNERSHIPS FOR THE FUTURE

Demands from local and export markets for more sustainable manufacturing and continual innovation need solutions.

O-I believes leaning and greening our products helps partner customers and the Australian wine industry to provide answers. The Lean+Green® range of lightweight wine bottles will:

- Maintain the premium image of the Australian wine industry;
- Help protect the industry against bottling moving away from its source;
- Protect, control and secure your brand; and
- Continue supporting Australian wine and related industries.
